About Us

An on-campus organization dedicated to research development and building of model rockets, in preparation of the 2018 IREC Competition in New Mexico.

Rocketry division is tasked to design, test, and build a rocket with target altitude of 10,000 ft. Alongside the aerodynamics and materials engineering disciplines associated with rocketry engineering, the division also had a focus of avionics, developing in-house solution for rocket simulation for aerodynamic diagnostics purposes.
